

# ***Torun (Tr) Station Report***

(Aug 29<sup>th</sup>, 2025)

## **Recent EVN Sessions**

One EVN session have been carried out since the previous report.

### **Feb/Mar 2025 session.**

Tr was scheduled in 85 regular disk projects at L, C, X and K bands during the first two EVN sessions. Phase instabilities were detected but the problem was investigated and solved before the second EVN session.

Toruń successfully participated in all e-EVN experiments. Tr also participated in PRECISE-VLBI experiments.

## **Hardware/software changes**

We installed new disk storage cluster (Ceph software-defined distributed platform) with 600TB dedicated to VLBI.
